

Technology, Cyber and Resilience Risk

Principal Consultant

BCS Consulting, part of Accenture – What we do

BCS Consulting, part of Accenture, sits within Accenture's Financial Services Strategy, and Consulting function in the UK, and was recently acquired by Accenture to strengthen their U.K. Financial Services Consulting and Technology Services Capabilities ([Accenture Acquires BCS Consulting to Strengthen its U.K. Financial Services Consulting and Technology Services Capabilities | Accenture](#)).

We're committed to delivering excellence and that's why world leading financial services businesses rely on us to bring about effective change within their organisations.

Our portfolio includes a varied and interesting range of multinational and UK banks, Wealth and Asset Management companies, Insurance firms and payment and card companies.

As a team of experts, we understand the importance of building on firm foundations and that's why you'll always find a broad range of core management consulting skills at the heart of our organisation.

The opportunity

BCS Consulting, part of Accenture, are looking for a candidate who can join our Risk and Finance service line with a specific focus on Technology, Cyber and Resilience-related risk management.

We are looking to significantly expand our capabilities and market footprint in this area by building expertise in several core disciplines such as information and technology risk management, operational and IT resilience, and cyber security. We are also focused on understanding and mitigating the risks associated with FinTech firms and the evolving IT sourcing arrangements and value-chains of Financial Services organisations.

Your knowledge in consulting, and in this specific area, will enable you to not only build our portfolio and market presence, but also help to develop and grow the team internally.

At BCS Consulting, part of Accenture, your career matters, that's why we invest in training and development and alongside your day-to-day role you will have access to amazing development opportunities allowing you to direct your career progression.

Responsibilities

You will be required to:

- Work on different types of projects, focusing on the key market topics for Technology Risk such as IT Risk & Control Management Frameworks, Cyber Threats Management, Information Security Risk Management and IT & Operational Resilience
